WORK EXPERIENCE

CLASSUM(Telta AI) Seoul, Korea
Project Delivery (Automation) Manager May 2025 ~ Present

- End-to-end delivery of AI-based HR skill assessment solution to 10+ enterprise clients including top-4 conglomerates and largest public institution; 3,500+ cumulative assessments.
- Built n8n-based automation pipeline reducing report generation time by 98% (7h → 3min per 50 reports); designed 3-stage QA pipeline (Rule-based → LLM-as-a-Judge → Vision LLM cross-validation) achieving 99.9% report integrity
- Authored PRD and prototype for Interview Pro (AI hiring interview tool); product commercialized and reached 200 users within 1 month of launch

KAKAO Corp. Pangyo, Korea
Policy Team Research Assistant June 2024 ~ Mar 2025

- Supported strategic planning for Kakao subsidiaries by analyzing global tech policy, AI/platform trends, and regulatory developments.
- Developed 4 standardized report templates of C-Level targeted reports; introduced NLP-based text mining and sentiment analysis process — reduced analysis turnaround from 12.3 to 5.8 days (50%+ time reduction), published 80 strategic reports

KAIST Quant-Marketing Lab. Daejeon, Korea
Researcher Aug 2022 ~ Aug 2024

- Quantitative marketing applies econometrics, statistics, and big-data analytics to explain consumer behavior — evolving from traditional methods to AI/ML-based analysis of new markets including metaverse and digital platforms.
- Master's thesis: "Determinants of VR Game Success" — empirically analyzed 67K user traffic records via econometric model and 660K reviews via LDA topic modeling; identified social presence and spatial immersion as key success drivers

Shard Partners LLC. Daejeon, Korea
Business Development & Marketing Strategy Intern June 2022 ~ Dec 2022

- Crawled 6 global NFT communities to analyze consumer reactions; identified Phygital hoodie with Invisible Signature tech as new product; proposed STP & 4P strategy targeting 10-20s fandom culture.
- Selected domestic and international crowdfunding as key go-to-market channel; compared competing products and prices across major NFT sales platforms.

SK C&C Seongnam, Korea
HR Program Operation Assistant Jan 2022 ~ Jan 2022

- Supported planning and operation of 2022 new employee onboarding program in hybrid environment; developed comprehensive training materials aligned with corporate values and operational procedures.

KEY PROJECTS

Classum(Telta AI) | 'InterviewPro' Product Planning & Commercialization June 2025 ~ Feb 2026

- Identified opportunity to apply Telta's rubric assets to hiring interviews; authored PRD and led prototype end-to-end. Designed full pipeline: real-time STT → LLM speaker separation → rubric scoring → HTML rendering → PDF. Built Telta's first n8n automation pipeline — report delivered within 5 minutes of interview completion. Product commercialized; 200 users within 1 month of launch.

Classum(Telta AI) | Enterprise-Scale Competency Assessment — Operations & Automation June 2025 ~ Feb 2026

- Systemized manual HR assessment operations into automated end-to-end pipelines — from PRD authoring to productization.
 - Leading semiconductor equipment firm (1,350 people) — Full pipeline systemization; Master Map scoring automation via Apps Script; AI growth guide & education matching built and internalized as product feature; 2026 contract scaled 2x.
 - Major beauty retail company (120 assessment sets) — Built survey-based pipeline from scratch when product was incomplete; scoring logic later adopted as official product feature.

Classum(Telta AI) | Leadership Assessment — Operations & Automation June 2025 ~ July 2026

- Operated AI-based leadership assessments for Korea's largest institutions. Designed rubric systems, built automated scoring and report pipelines.
 - National largest public institution — Leadership Center (300+ people, 2,000+ reports) — 28 rubrics across 7 levels; n8n pipeline delivering 50-person reports in under 5 min; recurring contract 10M+ KRW/month; client invited Telta for HQ lecture.
 - National largest public institution — HR Development (200~300 people) — 3-stage QA pipeline (Rule-based → LLM-as-a-Judge → Vision LLM); 99.9% report integrity; contributed to winning 5B KRW bid.
 - Major conglomerate training center — New executives (147 people, 300 reports) — Per-report production time reduced 99% (1 day/person → all 147 in 2 days).

NIA(한국지능정보사회진흥원) | Zero Trust Cloud Model: Digital Government Platform Standard Oct 2023 ~ Feb 2024

- Solely authored ~100-page chapter on Zero Trust Cloud model for Korea's Digital Government Platform standard guidelines. Structured Traditional → Advanced → Optimal 3-stage adoption roadmap across 5 domains (Identity, Device, Network, Application, Data).

STEPI(과학기술정책연구원) | Strategic Options and Government Policy Directions April 2022 ~ May 2022

- Case-studied traditional OEMs vs. new entrants (Tesla, Google) in automotive technology paradigm shift; analyzed business model divergence and derived policy implications. Contributed to published government research report.

KAIST | AI + Robotics Business Case Competition June 2023 ~ Nov 2023

- Led team as PM; 300+ literature reviews and C-level interviews; quantified DX outcomes (KRW 30M cost reduction, 50% labor/training savings). Applied VRINE, forward-backward integration, diversification models. Final report adopted as KAIST BTM teaching material.

KAIST | Data Analysis with Machine Learning & Deep Learning Model Project March 2023 ~ June 2023

- Engaged in a big data analysis project during the "Artificial Intelligence for Business Management" course, utilizing machine learning and deep learning models. Conducted text analysis with LSA, LDA, and Bert models and analyzed consumer sales data using K-mean Clustering, along with PCA and predictive modeling for crowdfunding data.

EXTRACURRICULARS

UNESCO Social Innovation and Venture Business Plan Project (HGU)

- Designed a healthcare platform focusing on PTSD treatment through art therapy, under the UNESCO UNITWIN program.
- Developed a business model and proposal aimed at integrating therapeutic and medical practices.

UNESCO UNITWIN Mongolia Global Project (HGU)

- Conducted an overseas training program in Mongolia, focusing on sustainable tourism product development. Facilitated lectures on Lean Canvas, field research, and sustainable business planning for students at the University of Ulaanbaatar.

BEEN_DOING

- Led team of planners, designers, and developers; built seasonal O2O brand targeting 20s; achieved KRW 8M revenue through goods sales and corporate collaborations
- Collaborated with Shard Partners on Phygital NFT hoodie; participated in CES 2024; 50-unit limited edition sold out in 2 days; reduced production cost 30% via factory negotiations; 7-day ad campaign reached 4,196 accounts
